Flutter Developer

Objective

Junior Flutter Developer with a Bachelor's degree in Computer Science from 6th of October University, graduating in 2024. Skilled in Dart and Flutter, with hands-on experience in developing mobile applications using bloc, Cubit, and Firebase. Adept at designing UIs, integrating APIs, and applying clean code practices.

Work Experience

Operations Associate – Amazon Logistics | UAE

- Worked in logistics operations, supporting daily operational activities and ensuring smooth workflow.
- Coordinated with team members to maintain operational efficiency and meet daily targets.
- Developed strong problem-solving, time management, teamwork, and communication skills in a fast-paced work environment.

Customer Service / Sales Representative – Etisalat Egypt

- Assist customers with telecom services, packages, and account-related inquiries.
- Explain products and services clearly and recommend suitable solutions based on customer needs.
- Handle customer complaints and inquiries professionally while maintaining a high level of customer satisfaction.
- Work effectively in a team-based branch environment and manage daily customer interactions.

Education

Bachelor of Computer Science and Information
6th of October University, Graduating in 2024

Technical Skills

- ☐ **Languages & Frameworks:** Dart, Flutter ☐ **State Management:** Bloc, Cubit
- **Backend & Cloud:** Firebase (Authentication, Firestore, Notifications)
- **Architecture:** MVVM, Clean Architecture
- **API Integration:** REST APIs, JSON handling
- **Tools:** Git, GitHub, Visual Studio Code, Android Studio
- **Other:** Microsoft Office (Word, Excel, PowerPoint)

Projects

1. FAKE Game – Reaction-Based Mobile Game (Coming Soon on Google Play)

- Developed a reaction-based mobile game using Flutter and Dart, designed to provide an interactive and challenging gaming experience.
- Implemented a target-based gameplay system with multiple levels and progressively increasing difficulty.

- Developed core game mechanics, including a timer system, target interaction, and Game Over functionality.
- Designed and implemented a responsive and user-friendly game interface.
- Added dynamic gameplay elements and level progression to enhance player engagement.
- Preparing the application for publication on Google Play.

2. Remind Me – Reminder Application (Submitted to Google Play, under review)

- Daily reminders with notifications
- Hive local storage
- Integrated notifications
- Dark/Light mode support and responsive UI

3. Notes Application

- Hive for local storage
- Bloc for state management
- Clean UI with smooth user experience

4. Bookly Application

- API integration for dynamic book data
- Bloc/Cubit for effective state management
- Responsive UI with clean architecture

5. Store Application

- E-commerce mobile app
- Product listing with categories and search
- Shopping cart and checkout process

6. Chat Application

- Real-time messaging app using Firebase
- Authentication system with login/logout
- Push notifications and user-friendly design

7. Fruit Market Application

- Mobile e-commerce app focused on fruits
- Product browsing and selection
- Shopping cart and seamless checkout
- Firebase backend + Bloc state management

Training

Internship - The Pixel Company

Online, 05/2024

- Participated in online training sessions, gaining hands-on experience in Flutter development and working on real-world projects under guidance.
- I developed an application named Rashaka, focusing on both the application page design and the creation of essential models. Throughout the development process, I adhered to best practices for clean code and organized the project by adding separate files for each frequently used feature.
- The application is currently available for download on Android, with plans for an iOS release coming soon.

Courses & Certifications

- Mastering Programming: A Comprehensive Course [Arabic] – Udemy
- Complete Flutter & Dart Development Course [Arabic] – Udemy
- Master Git & GitHub: Essential Skills for Developers [Arabic] – Udemy

- Flutter Advanced Course: Bloc and MVVM Pattern [Arabic] – Udemy
- Flutter Payment Integration: Stripe, PayPal & More! [Arabic] – Udemy
- Flutter & Firebase: Build Your Own E-Commerce App – Udemy
- Mastering Flutter: Responsive & Adaptive UI Design [Arabic] – Udemy
- Flutter App Creation: Google Maps Integration Guide [Arabic] – Udemy

Personal Skills

- Problem-Solving: Strong analytical and debugging skills.
- Team Collaboration: Effective in team-based projects.
- Adaptability: Quick learner of new tools and technologies.
- Communication: Clear in explaining technical concepts.
- Attention to Detail: Committed to high-quality code and design.
